

Gong Mini

DESIGN BY
SERGIO PRANDINA
2013

^{IT} Il secondo capitolo della storia di Gong racconta di una scia di piccole lanterne che accolgono e moltiplicano la luce. Con la versione Mini, Gong amplia ulteriormente la propria collezione e offre nuove possibilità per risolvere molteplici situazioni spaziali e luminose, creando movimenti fluidi ed eleganti. Per rendere Gong Mini ancor più versatile, è stato studiato un sistema di soluzioni di attacco a soffitto che permette di realizzare diverse composizioni, personalizzabili nella scelta della struttura e nel numero di punti luce. Oltre alla classica sospensione singola, è possibile ricreare installazioni multiple a raggiera, lineari o a cascata, progettando anche soluzioni custom, ideali per soffitti alti o che si sviluppano su diverse altezze.

^{EN} The second chapter of Gong's story is about a trail of small lanterns that hosts and multiplies light. With the Mini version, the Gong collection develops further and offers new possibilities to resolve multiple spatial lighting scenarios, creating fluid and elegant movements. In order to make Gong Mini even more versatile, a ceiling connection system has been designed which lets one create different compositions. It may be customized in terms of the structure and the number of lights. In addition to the classic single suspended lamp, it is possible to create various radial, linear or cascade installations. It was designed for customized solutions and it is ideal for high ceilings or those that have many different levels.
