

2M LARKO PROFILE ANODISED
B5552ANODA_2
SILVER ANODISED
IP20
CURRENT: YmA

Architectural extrusions for LED tape - dedicated to be mounted into ceilings and drywall. The height of the extrusion was designed to produce a single line of light with LEDs spaced 15 mm apart and a frosted cover HS 22. The extrusion can accomodate two of the 10 mm (0.39") wide LED strips. Extrusion can be mounted to a surface with the use of mounting springs. The bottom side of the LARKO profile extends beyond the left side of a drywall, interfering with the construction elements. Mounting across the ceiling structure calls for the use of additional space.
